

Summary

I am interested and active in the field of programming, algorithm design and data structure, the top rank in the 1402 entrance exam in the field of mathematics and am studying computer engineering at the University of Tehran at the bachelor's level

Skills

- Assembly programming language
 - C programming language
 - C++ programming language
 - Python programming language
 - Verilog programming language
 - C# programming language
 - MySQL
- web design with HTML, CSS and JavaScript
 - OOP (object-oriented programming)
 - Clean Code
 - Linux OS
 - Git and GitHub
 - Data Structures, Design Algorithms
 - Figma
- Excel
 - PowerPoint
 - Adobe Photoshop
 - Adobe Illustrator
 - Adobe Premiere Pro
 - Adobe Animate

Experience

WEBSITE DESIGN | NASIBA COMPANY | WORK PROJECTS | 08/2023 – 12/2023

- UI and UX design of Nasiba website and their implementation
- Management of Nasiba's customer database and data processing for customer ranking

PROGRAMMING | UNIVERSITY OF TEHRAN | ACADEMIC PROJECTS | 10/2023 – 01/2026

- Carrying out 63 academic projects at the University of Tehran

DATABASE MANAGEMENT | NOVIN-TECH BUSINESS ACCELERATOR| WORK PROJECTS | 05/2025 – 08/2024

- Designing database management software in the Novin Tech business accelerator

Education

BACHELOR OF COMPUTER ENGINEERING | UNIVERSITY OF TEHRAN | TEHRAN, IRAN | 10/2023 – To be continued

- Achieving high grades in the courses in Computer Fundamentals and Advanced Programming

TEACHING ASSISTANT | AMIRKABIR UNIVERSITY OF TECHNOLOGY | TEHRAN, IRAN | 10/2025 – 01/2026

- Teaching Assistant for the Computer Fundamentals course at the Faculty of Mathematics and Computer Science

Projects

- Plants vs Zombies Game: Developed using the SFML graphics library on Linux OS with C++.
- Car Wash Management Program: Implemented using object-oriented programming (OOP) concepts in C++.
- Comprehensive Educational System Website: Created a university-like system with a C++ backend and HTML, CSS, and JS frontend.
- Full-stack Windows Forms Application: Developed in C# with integrated SQL database management.
- Processor Design & Logic Synthesis: Design and implementation of logic synthesis to optimize gate counts in hardware processors.
- RISC-V Pipeline Processor: Implementation of a pipelined RISC-V architecture.
- MIPS Multi-Cycle Processor: Design and simulation of a multi-cycle MIPS processor.
- RISC-V Single-Cycle Processor: Implementation of a single-cycle RISC-V CPU.
- LIF Spiking Neuron RTL Design: Hardware design of a Leaky Integrate-and-Fire (LIF) neuron model.
- Hash Generator RTL Design & Logic Synthesis: RTL design and automated logic synthesis for a hash generation unit.
- Automated Logic Synthesis Tool: A project focused on the automation of the logic synthesis process.
- Bit-Serial Matrix-Vector Multiplier: Implementation of a hardware-efficient matrix-vector multiplier.
- Terminal-Based Full-Duplex Chat: A C-based communication tool for full-duplex chatting via terminal.
- ...

Languages

- Persian: Native

English: Upper-intermediate

Italian: Intermediate

Activities and Interests

Theater, Painting, Writing, Swimming, Mountaineering
